Personal Message to the Recipient of this Souvenir

It is the purpose of this small memento to make the recognition and thanks of the people of Stocksbridge Urban District, for your part in the common cause, as personal to you as is possible.

The restrictions which still prevail have compelled us to adopt this simple booklet as our personal gift. Will you please accept it as a symbol of the united gratitude of the local community for your individual share in the triumphant defence of our homes and liberties.

As the chief citizens of your township during the years of war and its aftermath, we have each of us had peculiar opportunities of assessing the unity of purpose which has bound us together in the corporate life of our Urban District. We feel sure that it will be a source of satisfaction to you personally to recall that, during your temporary absence from home, the work and aspirations of your relations and friends who remained and served in Industry, in Civil Defence, and in the Home, were of the very highest quality.

With thankfulness for your safe return to home and friends, we welcome you back to the community life of your own neighbourhood. May the ties which bound us all more closely during the years of war, be strengthened in the new era of peace, and may each one of us take pride in our citizenship, and in the performance of the duties we owe to each other in our township of Stocksbridge.
